

TECHNICAL DATA SHEET

TOP FINISH

For Maintaining Pre-Sealed Concrete

PRODUCT DESCRIPTION:

Calico Top Finish is a high-performance interior / exterior acrylic polish manufactured specifically for maintaining previously sealed concrete surfaces. Calico Top Finish is formulated to enhance and provide for additional scuff-resistance and protection to the pre-sealed concrete. Once applied to previously sealed concrete, Calico Top Finish will add exceptional resistance to dirt retention. Concrete floors, periodically maintained with Calico Top Finish, will retain their original sealed appearance longer.

INSTRUCTIONS FOR USE:

Surface must be clean, free of grease, oil, dirt, wax, polish or other foreign matter. Make certain that the bond to any previously applied stain or sealer is secure by applying Calico Top Finish to a small area and check for possible lifting before proceeding. On newly sealed concrete, allow 24-48 hours for sealer to cure before applying. Gently shake contents before use. After thorough preparation of surfaces, Calico Top Finish can be applied by spraying and following with rayon mop or by rayon mop and mop bucket. Apply as is. **DO NOT DILUTE.** One application, over a sufficiently sealed floor, is generally required. High traffic areas will require more frequent applications to maintain their high luster appearance. One gallon of Calico Top Finish will cover 500-1000 square feet depending upon surface porosity. Calico Top finish should be applied when surface temperature is between 55° - 85°F. Allow 2-3 hours between applications and 2-3 hours before using the finished surface. Longer drying time will be necessary during cool and humid applications. Do not allow Calico Top Finish to freeze. If allowed to freeze, material will not thaw to a usable product.

Distributed by:

See MSDS before using. Disposal of any unused material, if desired, must comply with Local, State and Federal Regulations. Calico Top Finish, like any good finish, reduces the porosity of the surface being finished. **BE AWARE** that oil, water, mud or other materials on a finished walkway can make the surface slippery and therefore potentially dangerous. Good housekeeping and maintenance are important - good drainage is imperative.

WARRANTY:

Calico Construction Products warrants that the contents of this container conform to the product's description on the label. There are no warranties which extend beyond the description on the face of the container. In no event shall Calico Construction Products be liable for any incidental damages of any nature whatsoever, including without limitation, loss of use or lost profits.
